

Our American Legion Family is reminded that if you are exposed to COVID-19 via an individual or group with positive indicators, then you are less likely to be an attendee at the

2021 National Convention in Phoenix, AZ.

Many of you have already decided to get a COVID vaccine as part of your healthcare.

The window for a possible quarantine clearance is **10-14 days**. Given that the Convention starts on August 26, 2021, delegates, alternates, and guests may have **insufficient time for a full clearance** – if they are exposed.

Whichever way you decide, if you haven't already, We hope that you'll favorably consider the shot.

As we prepare for the National Convention, the Department of Arizona highly recommends that you **mask up**, limit your social contacts, and avoid large crowds.

We look forward to your presence and participation at the 2021 National Convention in Phoenix, AZ.

Department Commander Ben Headen has recently been able to receive his at the Phoenix Veteran's Health Center.
